

**2013 Anne Amie
Cuvée A Muller-Thurgau
Yamhill-Carlton AVA**

Harvest
September 17 - October 14

Production
1694 cases

Release Date
March 2014

Retail
\$15

Varietal Composition
100% Muller-Thurgau

Vineyards
Anne Amie Estate 100%

Soil Types
Willakenzie

AVA - Yamhill-Carlton

Alcohol - 12.5%

Total Acidity - 6.6 g/L

pH - 3.23

Residual Sugar - 0.74%

Our estate-grown Muller-Thurgau comes from vines first planted in 1979. Crisp, fresh, and dry, it is a charming example of the variety at its best. From chicken to shellfish, this wine is a versatile match for mildly spicy foods like Thai, Creole, or Mexican.

VINIFICATION

Grapes were hand-picked and brought directly to the winery in 1/2 ton totes in perfect condition. They were whole cluster pressed and placed into temperature controlled stainless steel fermenters, where they were slowly fermented at 45°F for maximum varietal character. The wine aged on its lees for four months before being bottled.

VINTAGE DESCRIPTION

In vintages such as 2013, vineyard practices make or break the vintage. We are fortunate to have moved virtually exclusively to estate fruit for our production and came through a challenging vintage relatively unscathed. The Willamette Valley had an incredibly early start to the season, recording some of the earliest bud break dates known even to the pioneers. Both our Estate and Twelve Oaks sites broke bud close to each other in first week of April. We maintained decent weather right into flowering in early June, allowing our Estate site and the lower elevations at Twelve Oaks to set a decent crop. The cooler blocks at Twelve Oaks were only partially set or had not quite started flowering when an extended window of rain and cool temperatures set in. This created many "hens and chicks" (uneven berry size) in the clusters. So, Mother Nature thinned our vineyards for us, resulting in very balanced crop loads of 1.5 to 2 tons per acre, which is perfect for making a high quality wine. Summer precipitation in the Willamette Valley was close to a record low, which led to a warm, dry summer. In early September, everyone was excited about 2013. We saw fruit colored up and ripening into one of the earliest harvests on record. But around September 11th we started to see rain showing up in the 10-day forecasts. By the 16th, we realized that this rain was going to be a typhoon. Because we have complete control of our vineyards, we were able to harvest prior to the rain and also thin some sites and wait for flavors to develop. We picked our first Pinot noir on the 17th of September right behind the winery in what we call our "backyard." The fruit that came in was clean, ripe, full of flavor and utterly beautiful. We waited out the rain, and fortunately, October brought an extended warm, dry period in which we continued to pick. Our last Pinot noir was picked on October 14, nearly a month after the first Pinot noir was picked. Because of the field sorting and thinning, the remaining fruit came in 25% below our original estimates. Since we were given essentially three harvests in one - warm and early, cool and damp, and finally, warm and late, we have an amazing range of flavors to pull from for blending this year.

AROMA

honeysuckle, casaba melon, confectioner's sugar, starfruit, kumquat

FLAVOR

key lime, pink grapefruit, yellow plum, gala apple, citrus pith

FINISH

dry, rich

SUGGESTED FOOD PAIRINGS

paella, Pad Thai, Gorgonzola walnut pasta, moules frites, grilled oysters
